August 2001

INTRODUCTION

This publication provides statistical information to planners, educators, and employers regarding high school graduates in Tennessee. The data in High School Graduates are presented in a county summary table followed by statewide totals and county tables presented alphabetically.

The Tennessee Department of Labor and Workforce Development, in cooperation with the Tennessee Department of Education, conducts a survey of all schools that have enrollment in grades 9-12 and qualify to give a state of Tennessee diploma upon graduation. This includes all public schools, accredited private schools, and special schools in the state. The following tables list the number of schools and response rates as well as the number of graduates, their education and work plans, and the number of dropouts.

A special thanks is extended to school administrators and counselors who took time to answer this survey. Their cooperation will benefit the educators, employers, and planners across the state who will use this publication.

Note: Material in this publication is in the public domain and may be reproduced without permission of state government. Please credit the Tennessee Department of Labor and Workforce Development; Employment Security Division; Research and Statistics Section, and cite the name of the publication.

HIGHLIGHTS

Tennessee's 2000-2001 graduating class attended the state's 414 public and private high schools. There are 52 city high schools, 246 county high schools, 113 private high schools, and three state special schools that constitute the universe of this survey. The special high schools are for the vision and hearing impaired. This year the survey was enlarged to include all high schools that had students that qualified for a state of Tennessee diploma.

A little more than nine percent (9.2 percent) of the 2001 graduates attended private schools. In general, a far higher percentage of graduates from private schools (94.4 percent) intend to continue their education than graduates from public schools (66.9 percent). The four largest urban counties (Davidson, Knox, Hamilton, and Shelby) accounted for 36.2 percent of all Tennessee graduates. Of the graduates in those four counties 77.9 percent plan to continue their education. In the remaining 91 counties and the special schools, only 64.7 percent of the graduates plan on continuing their education.

The highest percentage of graduates continuing their education occurred in Crockett County (90.7 percent), Bradley County (84.9 percent), Moore County (84.2 percent) and Davidson and Hamilton counties (both 83.2 percent). The lowest percentage of graduates continuing their education occurred in DeKalb County (22.5 percent), Stewart County (28.3 percent), Hardeman County (29.9 percent), Johnson County (33.3 percent), and Jackson County (35.1 percent). Bledsoe, Cumberland, Houston, Lewis and Trousdale counties had no responses to this survey. This is the second straight year that Trousdale County has not responded.

A 94.9 percent response rate (393 schools) was achieved in this year's high school survey. The figures are not absolute measures; they represent the intentions of the 2000-2001 graduates. All data in this publication are preliminary accounts.

Graduates who did not fit into the categories of continuing their education, entering the labor force, or entering the armed forces were listed in the category of "other." These categories may not add to total graduates because of persons falling into more than one category (i.e., continuing education and entering the labor force).

Dropouts are students who left school before obtaining their high school diploma. The survey requested the number of dropouts, but some schools subtracted the number of students at the end of the year from the number at the beginning of the year. This methodology could include students who transferred to or from another school and could give inaccurate data; therefore, please be cautious using the data provided on dropouts.

N/A represents "not applicable" and is used when we did not receive any survey responses for a particular county. Schools that responded to the survey but had no graduates will have zeroes in the data column.
